THE CHALLENGE CONTINUES

Apple IIgs, IIc and IIe
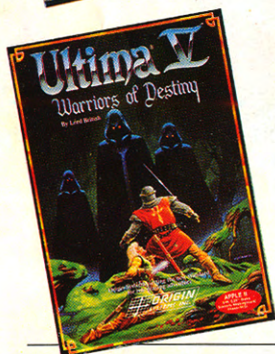

product catalogue

WHERE IN EUROPE IS CARMEN SAN DIEGO?

Mysterious Europe, full of danger and blood pumping exploration. You are a detective who must catch notorious criminals throughout Europe. Place the hidden clues, travel, investigate, question witnesses or ring your local tipsters. 30 countries full of geography, economic and historical information which lets you form the profile of the master criminal. Let that crafty detective out, and capture those criminals.

WHERE IN THE WORLD IS CARMEN SAN DIEGO?

An exciting simulation game during which you use international geographic information while trying to track down the master thief, Carmen. This package combines the best elements of graphic adventures, trivia games, mysteries and animation, as well as an introduction to world geography. Accompanying the software is the World Almanac and Book of Facts which, used in conjunction with the programme, encourages the use of problem solving and research skills.

ULTIMA V

Enter the realm of Britannia, a world rich in history, adventure and intrigue. Lord British, the benevolent King of Britannia, has been lost on an expedition to explore the vast reaches of a newly discovered underworld. Panic erupts in Britannia when the sole survivor of the expedition returns with dread tale of their fate. This game sets an unsurpassed standard for the role-playing genre.

WIZARDRY IV

The fourth Wizardry scenario for Apple IIgs. You are Werdna, the evil wizard who once decided to conquer the entire world. You awaken in a small room at the bottom of a prison maze. You are as weak as a newborn babe, your magical powers drained from you. This is Wizardry at the expert level. A test to the limit!

FLIGHT SIMULATOR II

Put yourself in the pilot's seat of a Piper 181 Cherokee and fly the skies! There are high-speed, colour 3D graphics which provide spectacular views of over eighty airports in four scenery areas. You control all manoeuvres by the full flight instrument panel and use of the flight handbook and information manual.

F-15 STRIKE EAGLE

F-15 Strike Eagle is a faithful simulation of the world's most advanced fighter plane. You'd better get ready to enter the world of dangerous modern electronic warfare. It combines excitement with challenge in every combat mission. It features hundreds of eye opening scenarios and truely awesome graphics. An endless supply of constructive entertainment.

CALIFORNIA CAMES™

"California gamers" will trek up and down the coast doing "goofy-foot backside carves" on Santa Cruz's "radical" waves, and "tic-tacking" to the top of the Hollywood skateboard competition. They'll roller-skate on Venice beach where fluorescent locals sport wheels in the air. And they'll tread through the rough and tumbliest turf in the west in the BMX bicycle event. Better get "stoked" 'cause *California Games* will be anything but "mellow."
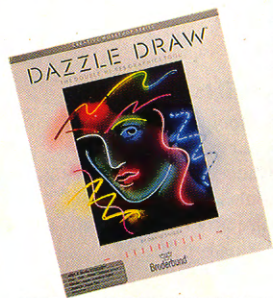

WORLD CLASS LEADERBOARD GOLF

Play the same extremely demanding courses that have challenged golf's greatest legends. It specially features some of the world's most famous courses. Very authentic reproduction of three well know courses, St. Andrews, Doral Country Club and Cypress Creek. The temptation is too great not to spend an addictive afternoon on your favourite courses.

PRINTSHOP

The PrintShop allows you to print your own coloured personalized greeting cards, invitations, letterheads, stationery, signs and banners. It features eight font styles with dozens of pictures, symbols, border designs, abstract patterns and Graphic Editor for creating your own designs. The PrintShop now allows you to print in colour your special designs.
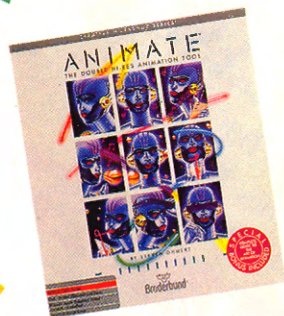

DAZZLE DRAW

Dazzle Draw is a free form, double hi-res drawing package which allows ease of use with pull down menus, "cut and paste"; mouse Koala pad or joystick control. You can use sixteen colours, and many special effects like brush strokes, spray paint, flood fill, zooms, and mirroring to create your own designs and then print them in full colour.

THE TOYSHOP

Marvellous Mechanical Models that really work! With the ToyShop you can assemble 20 workable mechanical models. The software contains the detailed diagrams — you choose one from the screen, personalize the design and print. Mount your designs on the sticky cardboard provided then cut out and assemble. All assembly aids like wire, string, rubber, wooden dowel are contained in the pack. REFILL PACKS are available for endless model creation.

ANIMATE

Animate is a double hi-res program in which you can create detailed cell-styled animation the same way as cartoonists and programmers do. It features pre-designed backgrounds and pre-animated objects and also soundtrack creation. You can print frames and scenes in colour and black & white. Also you can use graphics created with Dazzle Draw for inclusion in your animated scenes.

DRAW PLUS Apple IIgs

A full colour precision drawing text and graphics integration. From forms, graphs and charts to floor plans and perspective drawings, even landscape designs. Logos, letterheads and layouts. Graphics for business or banners for fun. Features pull down menus, mouse operation and a complete set of tools to draw upon. Thousands of colours, very comprehensive!

G.S. PAINT Apple IIgs

When you have GS paint, you immediately begin to unleash your creative potential. It's a remarkable multi-media paint program that gives you complete design and editing power. It lets you mix and match over 1,000 colours, shape and pattern or design, it's all at your command. It has multiple brushes, mouse interface and even can combine with animation.

SHOWOFF Apple IIgs

With ShowOff you will be able to produce your own visual aids in minutes. Very colourful, contemporary and professional looking. Overhead transparencies to on-screen "Slide Shows". Even hardcopy posters and handouts. ShowOff even lets you control a 35mm slide projector and make it part of a multimedia presentation. It's fast, it's foolproof and it's fun!

VISUALIZER Apple IIgs

Visualizer, a professional graphics application designed specifically for Apple IIgs, and written under ProDos 16. Visualizer can create all graphs and some in 3-D, it also includes statistical analysis and a definable axis. The IIgs includes mouse support, diagonal boxes and pull down menus. It is a very powerful and straightforward professional business tool.

THUNDERSCAN

You're ready to create detailed high-resolution graphics. Thunderscan scans in 16 shades of grey. You can create your own works of art. Working with dazzle draw and mousepaint, there is no limit to your personal creativity. Thunderscan supports all Apple II display modes and taps the full resolution of all Apple machines. Thunderscan is a very powerful, professional tool.

CREATIVE WRITING

BANK ST WRITER PLUS

Bank St Writer Plus is a sophisticated word processor designed to be as easy for you to use as the other products in the Bank St Series. This new version contains a sixty thousand word spelling corrector, an on line thesaurus, macro commands and new pull-down menus for mouse operation.

TYPE!

Type! is a new typing tutor which is suitable for both students and business professionals; beginners and advanced typists. It contains interesting exercises based on real words and sentences; and also a game. You can utilize advanced diagnostics and continually monitor your progress, then customize drills to individual errors. Progress reports are represented graphically or on a print out.

WRITERS CHOICE
ELITE Apple IIgs

You choose the words, Writers Choice Elite does the work. Colourfully, efficiently, accurately whether you're writing a letter, drafting a memo or composing **the** great novel. Writers Choice can handle it. It includes menus, mouse power, colour and you can add pictures if required through other programs. A top package.

SCIENCE TOOLKIT MASTER

Turn your Apple II into a sophisticated science lab. You can perform real world experiments — not simulations, using the two included sensory probes and four instruments in the software — thermometer, light meter, timer and strip-chart. The sensory probes interface with the joyport and experiments are detailed in a comprehensive Users Manual and Experiment Guide. The Science Toolkit allows you to handle scientific instruments, make accurate measurements and formulate theories. THE SCIENCE TOOLKIT SCHOOLS VERSION includes the Master Module with an additional Teachers Guide to outline experiment objectives, follow up questions and extension ideas plus an additional back-up disk.

MUSIC STUDIO Apple IIgs

At last, a complete music composition tool with power and performance matched only by its simplicity and ease of use. From colourful music notation to advanced editing, featuring midi interface and sheet music printouts. The music studio is the clear choice. If you want a software program that turns your computer into a fun musical partner, this is it!!!

SUPER SONIC Apple IIgs
Multi-Channel digitized stereo card

The Super Sonic enables the Apple IIgs to produce true stereo sound, and create spectacular sounds. Through Apple's Ensoniq chip it can produce stereo output for any software. High speed analog demultiplexing allows separation of audio into two separate channels which have advanced filters. It is truly an advanced accessory, connect it to your Hi-Fi Stereo or even headphones. A power pack of fun.
